Elements and Their Properties

Air

Earth

Water

Fire

Air represents the mind and intelligence, communication, telepathy, psychic powers, inspiration, imagination, ideas, knowledge, dreams and wishes. In rituals, Air is represented in the forms of tossing objects into the wind, aromatherapy, songs, and hiding things in high places. It rules spells involving travels, instruction, freedom, knowledge, discovering lost items, and can also be used to develop psychic faculties. Air also rules the visualization.

Pagan Sunday School

Belief in magic comes easily to children. A creative child, growing up on fairy tales, may even weave their own magic and cast their own spells as part of creative play without anyone ever teaching them the 'ins and outs' of magic. With that the first task for Pagan/Druid parents, who want to give their child a magical education, is to teach our kids the difference between movie magic (or performance magic) and what we consider 'real' magic (the use of symbolism, thought, energy, and creativity, to bring about change).

Join us this summer as we hope to teach children the basics of magic, an introduction to magic, centering, shielding, positive energy, and color symbolism, along with learning about the Gods and Goddesses, ethics, origins, purpose, life and life after death.

Each Sunday at 10:30a – 11:45a

\$5 per child

Starting June 3rd, 2018 – August 12th, 2018

No drop offs

Happy Birthday to the zodiac's most steadfast sign!

This is indeed your birthday month and this means that not only do you celebrate a special day but a special month all month long. The planetary positions now bring promises for the year ahead. Awareness is your key word for this upcoming year.

People and circumstances enter your life now that open you up to new experiences in relating. That means your relationships take on new meaning. This would be all kinds of relationships: intimate, friendship, family and the world at-large. Travel is certainly amped up for you and there is much learning to be gained from those travels.

So keep your diary ready for journal entry. You may decide to sign up for a course of study that will make changes in your learning curve. Now that would be awareness, wouldn't it? Happy Birthday, Dear One.

Is it your money, my money or our money? That question is spinning in your gray matter. Because dollars are often used as a mental stimulus for you, that question bears no threat. Rather it promises a new way of looking at resources and how to use them.

Try something different this month with money. Close your eyes and try to 'feel' for your answers. This means you don't think your way through, you feel your way through. Who knows, you may come up with a new way of making decisions.
